

For Immediate Release

Popular Micro Laser System Now Available in Infrared

January 15, 2013 (Rochester, NY) – The popular LaserMax® Micro™ laser system is now available in an Infrared version for use with night vision devices. The smallest and lightest in its class, Micro-IR is a perfect match for compact and even sub-compact pistols with a Picatinny or Weaver rail. Built to easily withstand the shock of recoil, Micro maintains a sleek and contoured profile and has nothing to hang up or snag when holstered or carried in a bag, pocket or on a belt. Only U.S. persons are eligible to purchase LaserMax IR products.

User installed onto the firearm frame, the Micro requires only one-inch of rail space, making it compatible with more pistol models than other any rail mounted laser offered today. Advanced features include an automated battery life preservation mode that switches the laser off after 10 minutes, safeguarding against the unintentional draining of battery life. LaserMax's signature Controlled Activation™ switch enables both left and right-handed shooters to activate the laser when needed, avoiding an inadvertent and potentially risky reveal of the user's position. The location of laser and activation place the trigger finger in a position that reinforces NRA rules for safe handling of firearms and also prevents any potential blocking of the beam by the trigger finger.

The Micro-IR joins LaserMax's visible Micro laser, providing a commonly requested solution for operators who utilize Night Vision Goggles (NVGs) in the field. At one time available solely to members of law enforcement and the military, IR laser sights are now also offered to civilians through select retailers. Scheduled to begin shipping in the first quarter of 2013, the Micro-IR will retail for \$229.

Export of LaserMax IR lasers is strictly prohibited without a valid export license issued by the U.S. Department of State Office of Defense Trade Controls, in accordance with International Traffic in Arms (ITAR), Title 22, Code of Federal Regulations Part 120–130. Transfer to a foreign person is considered an export even if done within the U.S. For further information, contact the Office of Defense Trade Control at (202) 663–1282.

Complete information on LaserMax product offerings is available at lasermax.com or by phone at (800) 527-3703. A detailed product catalog can also be requested from LaserMax, 3495 Winton Place, Rochester, NY 14623.

Now in its 24th year, LaserMax is a market leading producer of premium laser systems. Specializing in the design and manufacture of rugged and innovative firearm sighting solutions for military, law enforcement and commercial markets worldwide, the company also delivers premium laser products and optical systems for the semiconductor, aerospace, biomedical and telecommunications industries. LaserMax is an ISO 9001:2008 certified and WOSB 8(m) certified Women-Owned Small Business. All LaserMax products are designed and manufactured in a state-of-the-art facility in Rochester, New York, USA.
