For Immediate Release

LASERMAX RELEASES GREEN GUIDE ROD LASER FOR SIG SAUER PISTOLS

January 13, 2016 (Rochester, NY) – LaserMax's award winning Guide Rod Laser™ technology will now be offered in Green for the [Sig Sauer](#) P226 and P229 platforms. Scheduled for debut at the 2016 Shooting, Hunting, Outdoor Trade (SHOT) Show in Las Vegas, the [LMS-2261G](#) and [LMS-2291G](#) combine higher visibility with the most ruggedized laser sighting platform ever devised.

Green lasers operate in a band of the light spectrum most visible to the human eye and therefore are uniquely suited for laser sighting devices. Appearing brighter through the broadest range of lighting conditions, LaserMax's Green Guide Rod Laser constitutes the most advanced laser sight in this increasingly popular wavelength.

For over a quarter century, LaserMax's pioneering laser sighting systems have provided a decisive combat advantage to professional operators and armed Americans at home and abroad. [LMS-2261G](#) and [LMS-2291G](#) will arrive to retailers early 2016 with an everyday selling price of \$349

Complete information on LaserMax products is available at [lasermax.com](#) or by phone at (800) 527-3703. For the latest LaserMax news, follow LaserMax on [Instagram](#), [Twitter](#), [Facebook](#), and [YouTube](#).
