Step 4: Remove the SD card from the adapter and insert the SD card into the monocular card slot. Long press the power button on the monocular to turn it on.

Step 5: The software will automatically update. When the progress on the screen displays 100%, it means the update is complete.

Step 6: Pull out the SD card and long press the power button, the boot logo will be displayed on the screen.

Step 7: Place SD card back into adapter in computer. Open file explorer, then open the SD card.

Step 8: Delete the .bin file, then remove the SD card and adapter. Re-insert the SD card into the monocular. When turning on the monocular it should no longer show the updating screen. The monocular is ready for use.
